Dear Sirs,

this is to inform you that due to difficulties in being supplied with pistons, we are compelled to adopt the same pistons for both PARILLA GAZELLE 60cc and PARILLA 60cc MINI SWIFT engines.

This means that after exhaustion of our present stock of pistons, the piston installed on the PARILLA GAZELLE 60cc engine will be identical to the one installed on the PARILLA MINI SWIFT engine, and that is with 1,5mm thickness ring.

Kindly take note that, regarding all other characteristics, the new piston is perfectly identical to the previous one.

Thank you for your attention and best regards.
